Office Action Summary			0/091,065		VINBERG, ANDERS				
			aminer		Art Unit				
		Ph	nilip C. Lee		2152				
Period fo	The MAILING DATE of this communi r Reply	cation appears	s on the cove	r sheet with the co	orrespondence ad	ldress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1) 又	Responsive to communication(s) file	d on <u>28 <i>April 2</i></u>	<u>2006</u> .						
· —	•	2b)⊠ This act		ıal.					
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is								
, —	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims									
4)⊠	4)⊠ Claim(s) <u>1-9,11-20,31 and 32</u> is/are pending in the application.								
	4a) Of the above claim(s) is/are withdrawn from consideration.								
5) Claim(s) is/are allowed.

Application/Control Number: 10/091,065 Page 2

Art Unit: 2152

1. This action is responsive to the amendment and remarks filed on April 28, 2006.

- 2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/24/06 has been entered.
- 3. Claims 1-9, 11-20 and 31-32 are presented for examination.
- 4. The text of those sections of Title 35, U.S. code not included in this office action can be found in a prior office action.

Claim Rejections – 35 USC 103

- 5. Claims 1-5, 9 and 11-15 rejected under 35 U.S.C. 103(a) as being unpatentable over Touboul, U.S. Patent 6,125,390 (hereinafter Touboul) in view of Jacobs, U.S. Patent 5,761,502 (hereinafter Jacobs).
- 6. Touboul was cited in the last office action.

Art Unit: 2152

7. As per claims 1, 9 and 11, Touboul taught the invention substantially as claimed for reporting the context of an alert condition, comprising:

reporting an alert condition associated with a subject system object (col. 8, lines 10-12; col. 6, lines 54-61); analyzing the system objects associated with the alert condition to obtain context data (col. 5, lines 7-10; col. 4, lines 39-44; col. 7, lines 40-49); generating a context message based on the context data (col. 5, lines 7-10; col. 7, lines 40-49); and outputting the context message (col. 8, lines 31-34; col. 14, lines 6-7, 20-23).

- 8. Touboul did not teach accessing a database to identify a group of system objects known to be associated with one another. Jacobs taught accessing a database to identify a group of system objects known to be associated with one another (col. 8, lines 5-7; col. 9, lines 9-14, 24-37; col. 14, lines 11-19); and identifying, from the group of system objects, a relevant system object that is known to be associated with the subject system object (col. 9, lines 48-54; col. 13, lines 8-63; col. 14, lines 38-53).
- 9. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to combine the teachings of Touboul and Jacobs because Jacobs's teaching of accessing a database to identify a group of system object known to be associated with one another would increase the alertness of network management personnel by providing a view of the current state of the network that correlates related network events (col. 2, lines 29-65).

context of the alert condition (col. 14, lines 20-25).

Art Unit: 2152

10. As per claims 2 and 12, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul further taught including receiving a request to report the

Page 4

- 11. As per claims 3 and 13, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul further taught wherein the analyzing includes determining properties of the subject system object (col. 7, lines 40-49).
- 12. As per claims 4 and 14, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul further taught wherein analyzing includes determining a physical location of a component represented by the subject system object (col. 4, lines 39-44).
- 13. As per claims 5 and 15, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Jacobs further taught wherein analyzing includes determining a logical relationship of a component represented by the subject system object to a component represented by the relevant system object (col. 13, lines 8-63; col. 14, lines 38-52).
- 14. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Touboul and Jacobs for the same reason set forth in claim 1 above.

Application/Control Number: 10/091,065 Page 5

Art Unit: 2152

15. Claims 6 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Touboul and Jacobs in view of Cox, U.S. Patent 6,011,838 (hereinafter Cox).

- 16. Cox was cited in the last office action.
- 17. As per claims 6 and 16, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul and Jacobs did not teach determining a traffic load associated with the subject system object. Cox taught determining a traffic load associated with a system object (col. 3, lines 30-50).
- 18. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Touboul, Jacobs and Cox because Cox's teaching of determining a traffic load would increase the efficiency of Touboul's and Jacobs's systems by minimize the amount of failure cause by overloading a system object (col. 1, lines 11-15).
- 19. Claims 7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Touboul and Jacobs in view of Grace, U.S. Patent 5,748,098 (hereinafter Grace).
- 20. Grace was cited in the last office action.
- 21. As per claims 7 and 17, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul and Jacobs did not explicit teach a component that is

Art Unit: 2152

dependent on a component represented by the subject system object. Grace taught wherein the relevant system object representing a component that is dependent on a component represented by the subject system object (col. 1, lines 40-56; col. 3, lines 5-15).

Page 6

- 22. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Touboul, Jacobs and Grace because Grace's teaching of relevant system object representing a component that is dependent on a component represented by the subject system object would increase efficiency of Touboul's and Jacobs's systems by avoiding time wasted on investigating the sources of all the alert condition associated with dependent resources (col. 1, lines 40-56).
- 23. Claims 8 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Touboul and Jacobs in view of Nishida, U.S. Patent 5,440,688 (hereinafter Nishida).
- 24. Nishida was cited in the last office action.
- 25. As per claims 8 and 18, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 18 above. Touboul and Jacobs did not teach wherein generating includes replacing quantifiable context data with a qualitative identifier. Nishida taught a similar invention wherein generating includes replacing quantifiable context data with a qualitative identifier (col. 3, lines 29-40).

Art Unit: 2152

26. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Touboul, Jacobs and Nishida because Nishida's teaching of replacing quantifiable context data with a qualitative identifier would increase the user alertness in Touboul's and Jacobs's systems by allowing alarm with critical level being at the highest in the range of emergencies demanding immediate attention by the network management personnel (col. 3, lines 36-38).

Page 7

- 27. Claims 19-20 and 31-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Touboul and Jacobs in view of Fanshier et al, U.S. Patent 5,933,601 (hereinafter Fanshier).
- 28. Fanshier was cited in the last office action
- 29. As per claims 19 and 31, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul and Jacobs did not specifically detailing the relevant system object represents a sub-component of the subject system object. Fanshier taught wherein the relevant system object represents a component that is a sub-component of a component represented by the subject system (fig. 3; col. 5, lines 15-41).
- 30. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Touboul, Jacobs and Fanshier because Fanshier's teaching of the relevant system object represents a component that is a sub-component of a component represented by the subject system would increase the alertness of Touboul's and Jacobs's

Art Unit: 2152

systems by providing the relationship of components using an object-based presentation of components executed by each of the nodes within a network in a hierarchy form (col. 1, lines 36-44).

Page 8

- 31. As per claims 20 and 32, Touboul and Jacobs taught the invention substantially as claimed in claims 1 and 11 above. Touboul and Jacobs did not specifically detailing the relevant system object represents a grouping with the subject system object. Fanshier taught wherein the relevant system object represents a component that is in a grouping with a component represented by the subject system object (fig. 3; col. 5, lines 15-41).
- 32. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Touboul, Jacobs and Fanshier because Fanshier's teaching of the relevant system object represents a component that is in a grouping with a component represented by the subject system object would increase the alertness of Touboul's and Jacobs's systems by providing the relationship of components using an object-based presentation of components executed by each of the nodes within a network in a hierarchy form (col. 1, lines 36-44).

CONCLUSION

33. Applicant's arguments with respect to claims 1-9, 11-20 and 31-32, filed 4/28/06, have been fully considered and are moot in view of new grounds of rejection.

Art Unit: 2152

A shortened statutory period for reply to this Office action is set to expire THREE MONTHS from the mailing date of this action. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C Lee whose telephone number is (571)272-3967. The examiner can normally be reached on 8 AM TO 5:30 PM Monday to Thursday and every other Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bunjob Jaroenchonwanit can be reached on (571) 272-3913. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
